Notes:

\*Employment are from nonfarm series (Current Employment Statistics)  
 — monthly estimates of nonfarm employment by industry  
 — 2011 data are preliminary

Some columns may not add up to their totals due to rounding

The employment are "jobs" data, which is by place of work  
 — this allows for multiple count of workers (if they hold more than one job)  
 — this allows for commuters from other states to be counted in the data
